About

iOS Developer with 8+ years of experience building high-quality, scalable iOS apps using Swift, SwiftUI, and modern architectures (MVVM, MVP, VIPER). Focused on clean code, performance, and user-friendly design.

Seeking a software house with a collaborative, open-minded team where I can brainstorm and contribute to efficient, elegant solutions. I'm also passionate about working in Agile environments, which has always been a key career goal.

Work Experience

Senior iOS Developer (Unit Labs)

June 2024 – Present

At Unit Labs, I worked on EKash, a large-scale FinTech app in Egypt for batch payments and money transfers, contributing to both **iOS and Android platforms**.

- Developed core iOS features using **SwiftUI**, **MVVM**, and **Clean Architecture** to build scalable and maintainable modules
- Utilized **Combine** for reactive programming and efficient asynchronous data handling
- Implemented secure data storage using **Keychain** and applied **encryption** techniques to protect sensitive financial data
- Integrated **biometric authentication** (Face ID / Touch ID) to enhance app security
- Monitored and improved app stability using **Firebase Crashlytics**
- Optimized performance across critical flows (payments, authentication) for better responsiveness
- Contributed to **CI/CD pipelines** to automate build, testing, and deployment processes
- Leveraged AI tools (Claude, Cursor) to accelerate development, assist in code generation, debugging, and improving productivity

Senior iOS Developer (Masroofi)

Jan 2023 – May 2024

At **Masroofi**, I worked on a FinTech application for kids and parents, enabling safe, controlled financial management within families.

- Built and contributed to a **family-focused FinTech app** supporting kids and parents in managing pocket money digitally
- Developed key features using **SwiftUI** with a clean, modern, and responsive UI
- Applied **MVVM-C architecture** to ensure a scalable, maintainable, and well-structured codebase
- Implemented secure financial flows for spending, saving, and parental control over transactions
- Worked on core modules enabling cashless payments via app and prepaid cards
- Contributed to building a scalable system supporting multiple financial actions (earn, spend, save, invest) under full parental oversights

Senior iOS Developer (Future Group)

Jun 2017 – Dec 2022

- Worked on multiple mobile applications across marketplaces, logistics, translation, and vendor management using **MVVM architecture for iOS (UIKit)** and **Flutter for cross-platform development**
- Contributed to products including Vendors for Talent, Torjoman, Toama, Alex AI, and logistics platforms (Garrar Driver & Shipper)
- Integrated **Firestore, Google Maps, Analytics**, and **Home Widgets** to support core business flows
- Improved performance, stability, and added **unit testing**
- Collaborated with cross-functional teams to deliver high-performance, user-focused mobile solutions

Mid - Senior iOS Developer (IVAS)

Mar 2016 – May 2017

- Developed mobile applications for **iOS (UIKit)** and **Android**, following **MVP architecture** and integrating **Firestore services**
- Built key features including authentication, notifications, content management, and offline support
- Contributed to apps like *Mishary Rashid Alafasy* (Quran streaming) and *Amnia ShilBaya* (content platform)
- Improved performance, stability, and added **unit testing**

iOS Developer (Starware)

Jul 2015 – Mar 2016

Developed and published multiple iOS & Android applications across different domains such as News, Logistics, and Education, focusing on scalable, maintainable, and user-friendly products

- Worked on news applications like **ElWatan News** and **ElTahrir News**, enabling users to browse the latest articles, receive real-time updates, and save content for offline reading
- Contributed to building core features such as news feeds, article details, offline access, and push notifications to improve user engagement and retention
- Participated in developing end-to-end app functionality, including API integration, data handling, and performance optimization to ensure smooth content delivery
- Collaborated with cross-functional teams to deliver stable releases and enhance overall app reliability and user experience

Tools & Technologies

- | | |
|---|--|
| • Swift, SwiftUI, Java, Dart, Flutter | • SQLite, Room, Codable SPM |
| • MVVM-C, VIPER, MVVM, Clean Architecture | • CocoaPods, Fastlane, CI/CD Pipelines |
| • Combine, RxSwift, RxJava | • GitHub, Jira, Slack, Agile |
| • OOP, SOLID Principles | • Core Location, Google Maps |
| • REST APIs, Firebase | • Unit Testing |
| | • Claude AI, Cursor |

Education

2018 – 2022: Master of Software Engineering, Faculty of Computers and Artificial Intelligence, Cairo University.

2014-2015: Mobile Application Development Track, 9-Month Scholarship, Information Technology Institute (ITI).

2007 – 2012: BSc in Computer Engineering, Mansoura University

Certifications

- Oracle Certified Java Professional
- ITI Diploma in Mobile Development (Intake 35)
- Google Associate Android Developer
- Flutter Development Nanodegree – Udacity
